Puerto Rico Farm Credit, ACA

Management's Discussion and Analysis of Financial Condition and Results of Operations

(dollars in thousands)

The following commentary reviews the consolidated financial condition and results of operations of Puerto Rico Farm Credit, ACA (Association) for the three months ended March 31, 2010. These comments should be read in conjunction with the accompanying consolidated financial statements, notes to the consolidated financial statements, and the 2009 annual report of the Association. The accompanying consolidated financial statements were prepared under the oversight of the Audit Committee of the Board of Directors.

LOAN PORTFOLIO

The Association provides funds to farmers, rural homeowners, and farm-related business for financing short and intermediate-term loans and long-term real estate mortgage loans. The Association also maintains a portfolio of purchased loans, originated by other Farm Credit System entities and non-system entities. The Association's predominant chartered territory agricultural commodities were dairy, livestock, field crops and fruits which totaled approximately $104,507 or 47.7 percent of all outstanding loan volume at March 31, 2010.

The loan volume of the Association at March 31, 2010 was $217,618, a decrease of $9,608 or 4.2 percent as compared to $227,226 at December 31, 2009. Loans originated within the Association's chartered territory were lower by approximately $3,533, while participation loans purchased decreased by approximately $6,075.

Net loans outstanding at March 31, 2010 totaled $215,131 as compared to $224,506 at December 31, 2009. Net loans at March 31, 2010 made up 91.7 percent of total assets, the same percentage as at December 31, 2009.

As a percentage of loans, nonaccrual loans equaled 9.82 percent at March 31, 2010, compared with 8.41 percent at December 31, 2009. The increase in the percentage of nonaccrual loan volume during the first three months of 2010 occurred primarily as a result of transferring chartered territory loans into nonaccrual. Specific borrowers have continued to find it difficult to maintain a current repayment status, given the island's four years of recessionary economic status. However, the overall delinquency rate for the chartered territory accruing loan portfolio has remained favorable, supported by the lower interest rate environment. The significant increase in both the number of loans and the volume of loans transferred to nonaccrual during the past year has resulted in a decline in the loan portfolio's overall credit quality. Management expects to see a leveling off of the deterioration in credit quality during the second half of 2010.

The allowance for loan losses decreased by $233 to $2,487 at March 31, 2010, from $2,720 at December 31, 2009. The decrease related primarily to the net change in the specific reserves established for loans in nonaccrual status. During the quarter, one large purchased participation loan required a reversal of the specific reserve previously established. The ratio of allowance to outstanding loan volume decreased to 1.14 percent at March 31, 2010 from 1.20 percent at December 31, 2009 as a result of the level of nonaccrual loan volume that required related specific reserves. During the first three months of 2010, charge-offs totaled $20 and there were no recoveries. Management anticipates provision expense and increased charge-off activity during the balance of 2010, rather than the provision reversal of the first quarter.

RESULTS OF OPERATIONS

For the three months ended March 31, 2010

For the first quarter of 2010, the Association recognized net income of $1,211 an increase of $1,205 when compared to net income of $6 for the first quarter of 2009. The primary drivers of this increase were the $213 reversal of the provision for loan losses and the stock and premium refunds received from the Farm Credit System Insurance Corporation (FCSIC) which totaled $704. These two items were partially offset by decreases in net interest income and noninterest income.

Net interest income for the three months ended March 31, 2010 was $1,054 compared to $1,144 for the three months ended March 31, 2009. The Federal Reserve's decision to maintain a lower interest rate environment for an extended period of time has had a negative impact on the interest credit earned on the Association's loanable funds invested with AgFirst FCB.

Noninterest income for the first quarter of 2010 was $1,202 compared to $698 for the first quarter of 2009. The year-over-year increase was primarily related to the refund distributions received from the Farm Credit System Insurance Corporation. It is not anticipated that the Association will receive any additional refunds from the FCSIC during 2010. However, these refunds were partially offset by a decrease in the estimated AgFirst patronage distribution accrued for the first quarter of 2010, as a result of lower borrowing levels with AgFirst FCB (the Bank).

For the first quarter of 2010, noninterest expense increased by $4 to total $1,256 as compared to the first quarter of 2009 for which noninterest expense totaled $1,252. The increase for the quarter was primarily related to the timing of the recognition of the Association's annual meeting expense, which offset the material decrease in the accrued FCSIC insurance fund premium expense for 2010.

Key Results of Operations Ratios

	Annualized for the three months ended 3/31/10	For the year ended 12/31/09
Return on Average Assets	2.06%	(0.33)%
Return on Average Members' Equity	8.95%	(1.54)%
Net Interest Income as a Percentage of Average Earning Assets	2.10%	1.93%

LIQUIDITY AND FUNDING SOURCES

Liquidity

Liquidity management is the process whereby funds are made available to meet all financial commitments including the extension of credit, payment of operating expenses and payment of debt obligations. The Association receives access to funds through its borrowing relationship with the Bank and from income generated by operations. Sufficient liquid funds have been available to meet all financial obligations.

Funding Sources

The principal source of funds for the Association is the borrowing relationship established with the Bank through a General Financing Agreement. The General Financing Agreement utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw funds. The funds are advanced by the Bank to the Association in the form of notes payable. The notes payable are segmented into variable rate and fixed rate sections. The variable rate notes are utilized by the Association to fund variable rate loan advances and operating funds requirements. The total notes payable to the Bank at March 31, 2010 were $175,965 as compared with $187,237 at December 31, 2009. The decrease of $11,272 or 6.0 percent corresponded closely to the decrease in outstanding loan volume of $9,608 and receipt in January of the amount due from AgFirst Farm Credit Bank at December 31, 2009.

The Association had no lines of credit outstanding with third parties as of March 31, 2010.

Funds Management

Demand for loan types is a driving force in establishing a funds management strategy. The Association offers variable and fixed rate loan products which are competitively priced according to local market rates. Variable rate loans are generally indexed to either the Prime rate or the London Interbank Offered Rate (LIBOR). The majority of the interest rate risk in the Association balance sheet is transferred to the Bank through the notes payable structure. The Bank, in turn, actively utilizes funds management techniques to identify, quantify and control interest rate risk associated with the loan portfolio.

CAPITAL RESOURCES

Total members' equity at March 31, 2010 increased 2.2 percent to $55,889 from December 31, 2009 when total members' equity was $54,674. The increase of $1,215 was primarily attributable to the year-to-date net income which totaled $1,211 at March 31, 2010.

Total capital stock and participation certificates were $711 on March 31, 2010 compared to $721 on December 31, 2009. The decrease of $10 was the net result of refunding more stock to non-borrowing stockholders than new stockholders purchasing capital stock or participation certificates.

Unallocated retained earnings increased $1,226 or 2.3 percent from December 31, 2009 when unallocated retained earnings totaled $53,208. The increase was from net income of $1,211 earned during the first three months of 2010 and a patronage dividend adjustment of $15 to reconcile the year-end estimated dividend payable to the Association's 2009 federal taxable income.

The Board of directors intends to continue its policy of declaring cash patronage dividends. 2009 was the twentieth consecutive year of paying dividends. The table below sets forth the recent amount of patronage dividends declared:

Year	Amount Declared
2009	$615
2008	$2,000
2007	$3,250

The amount of dividends, as always, will depend upon continued strong earnings, the amount of taxable income, the overall financial condition of the Association and credit-related factors.

The Association's regulatory permanent capital ratio at March 31, 2010 was 18.65 percent compared to 17.39 percent at December 31, 2009. The Association's total surplus and core surplus ratios were both 18.32 percent at March 31, 2010. All three ratios were well above the minimum regulatory ratios of 7.00 percent for permanent capital and total surplus ratios and 3.50 percent for the core surplus ratio.

Key financial condition ratios were as follows:

	3/31/10	**12/31/09**
Total Members' Equity to Asset	23.83%	22.32%
Debt to Total Members' Equity	3.20 : 1	3.48 : 1

Recently Issued Accounting Pronouncements

Please refer to Note 1, *"Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements",* in the Notes to the Financial Statements, and the 2009 Annual Report to Shareholders for recently issued accounting pronouncements.

NOTE: Shareholder investment in the Association could be affected by the financial condition and results of operations of AgFirst Farm Credit Bank. Copies of AgFirst's annual and quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 378, or writing Stephen Gilbert, AgFirst Farm Credit Bank, P.O. Box 1499, Columbia, SC 29202. Information concerning AgFirst Farm Credit Bank can also be obtained at its website, *www.agfirst.com*. Copies of the Association's annual and quarterly reports are also available upon request free of charge by calling 1-800-981-3323, or writing Bruce M. Hoffman, CFO, Puerto Rico Farm Credit, ACA, PO Box 363649, San Juan, PR 00936-3649, or accessing the website, *www.puertoricofarmcredit.com*. The Association prepares a quarterly report within 40 days after the end of each fiscal quarter, except that no report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the Association.

Notes to the Consolidated Financial Statements

(dollars in thousands, except as noted)
(unaudited)

NOTE 1 — ORGANIZATION, SIGNIFICANT ACCOUNTING POLICIES, AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

The accompanying financial statements include the accounts of Puerto Rico Farm Credit, ACA (the Association). A description of the organization and operations of the Association, the significant accounting policies followed, and the financial condition and results of operations as of and for the year ended December 31, 2009, are contained in the 2009 Annual Report of the Association. These unaudited first quarter 2010 consolidated financial statements should be read in conjunction with the 2009 Annual Report of the Association.

The accompanying consolidated financial statements contain all necessary adjustments for a fair presentation of the interim financial condition and results of operations and conform with generally accepted accounting principles (GAAP) and prevailing practices within the banking industry. The results for the three months ended March 31, 2010 are not indicative of the results to be expected for the year ending December 31, 2010.

Certain amounts in the prior period's consolidated financial statements may have been reclassified to conform to the current period's consolidated financial statement presentation. Such reclassifications had no effect on the prior period net income or total capital as previously reported.

The Association maintains an allowance for loan losses in accordance with GAAP. The loan portfolio is reviewed quarterly to determine the adequacy of the allowance for losses. As of March 31, 2010, the allowance for losses is adequate in management's opinion to provide for possible losses on existing loans.

In addition to the recently issued accounting pronouncements discussed in the 2009 Annual Report of the Association, in June 2009, the Financial Accounting Standards Board (FASB) issued guidance "Accounting for Transfers of Financial Assets," which amended previous guidance by improving the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets.

This guidance was effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. Earlier application was prohibited. This guidance must be applied to transfers occurring on or after the effective date. Additionally, on and after the effective date, the concept of a qualifying special purpose entity is no longer relevant for accounting purposes. Therefore, formerly qualifying special-purpose entities (as defined under previous accounting guidance) should be evaluated for consolidation by reporting entities on and after the effective date in accordance with the applicable consolidation guidance. If the evaluation on the effective date results in consolidation, the reporting entity should apply the transition guidance that requires consolidation. The Association evaluated the impact of adoption on its loan participation agreements to ensure that participations would meet the requirements for sales treatment. The impact of adoption on January 1, 2010 was immaterial to the Association's financial condition and results of operations.

In June 2009, the FASB also issued guidance, to improve financial reporting for those enterprises involved with variable interest entities, which amends previous guidance by requiring an enterprise to perform an analysis to determine whether the enterprise's variable interest or interests give it a controlling financial interest in a variable interest entity.

Additionally, an enterprise is required to assess whether it has an implicit financial responsibility to ensure that a variable interest entity operates as designed when determining whether it has the power to direct the activities of the variable interest entity that most significantly impact the entity's economic performance.

This guidance was effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period and for interim and annual reporting periods thereafter. Earlier application was prohibited. The Association does not have any variable interest or controlling interest in a variable entity. Therefore, there was no impact of adoption of the guidance for the Association.

In January 2010, the FASB issued guidance "Fair Value Measurements and Disclosures," which is to improve disclosures about fair value measurement by increasing transparency in financial reporting. The changes will provide a greater level of disaggregated information and more detail disclosures of valuation techniques and inputs to fair value measurement. The new disclosures and clarification of existing disclosures were effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the rollforward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption of this guidance had no impact on the Association's financial condition and results of operations but resulted in additional disclosures (see Note 7).

NOTE 2 — ALLOWANCE FOR LOAN LOSSES AND IMPAIRED LOANS

An analysis of the allowance for loan losses follows:

	For the three months ended March 31,	
	2010	2009
Balance at beginning of period	$ 2,720	$ 1,254
Provision for (reversal of) loan losses	(213)	584
Charge-offs	(20)	(406)
Recoveries	–	–
Balance at end of period	$ 2,487	$ 1,432

The following table presents information concerning impaired loans as of March 31,

	2010	2009
Impaired loans with related allowance	$ 2,432	$ 4,628
Impaired loans with no related allowance	18,968	14,377
Total impaired loans	21,400	19,005
Allowance on impaired loans	$ 628	$ 1,096

The following table summarizes impaired loan information for the three months ended March 31,

	2010	2009
Average impaired loans	$ 20,019	$ 15,241
Interest income recognized on impaired loans	91	30

NOTE 3 — COMMITMENTS AND CONTINGENT LIABILITIES

Actions are pending against the Association in which money damages are sought. However, on the basis of information now at hand, management and legal counsel are of the opinion that the ultimate liability, if any, resulting therefrom, would not be material in relation to the overall financial position of the Association.

NOTE 4 — EMPLOYEE BENEFIT PLANS

The following is a table of retirement and other postretirement benefit expenses for the Association:

	For the three months ended March 31,	
	2010	2009
Pension	$ 269	$ 259
401(k)/1165(e)	14	17
Other postretirement benefits	23	15
Total	$ 306	$ 291

The following is a table of retirement and other postretirement benefit contributions for the Association:

	Actual YTD Through 3/31/10	Projected Contributions For Remainder of 2010	Projected Total Contributions 2010
Pension	$ –	$ 913	$ 913
Other postretirement benefits	25	75	100
Total	$ 25	$ 988	$ 1,013

Contributions in the above table include an allocated estimate of funding for the multi-employer pension plan in which the Association participates. The projected amount may change when a total funding amount and allocation is determined by the pension Plan's Sponsor Committee. Also, market conditions could impact discount rates and return on plan assets which could change the contribution necessary before the next plan measurement date of December 31, 2010.

Further details regarding employee benefit plans are contained in the 2009 Annual Report to Shareholders.

NOTE 5 — NOTES RECEIVABLE FROM OTHER FARM CREDT INSTITUTIONS

In September 2008, the Association used capital reserves to purchase $10,000 total of fixed rate unsecured subordinated notes issued by two other associations in the AgFirst District, both notes due in 2018. The notes receivable are subordinate to all other categories of creditors of the issuing associations, including any claims of the Bank and general creditors, but are senior to all classes of shareholders of the issuing associations. The notes receivable are not considered System debt, and thus are not guaranteed by the System and not insured by the Insurance Corporation. Since the notes receivable are only guaranteed by the issuing associations, repayment could be negatively impacted by funding, credit, and/or counterparty risks encountered by the two issuing associations in their business operations.

The notes receivable bear interest at an annual fixed rate of 9.00 percent, payable on the fifteenth day of each month, beginning on October 15, 2008. Interest will be deferred if, as of the fifth business day prior to an interest payment date, any applicable minimum regulatory capital ratios are not satisfied by the issuing association(s). A deferral period may not last for more than five consecutive years or beyond the maturity date of the note(s). During such a period, the issuing association(s) may not declare or pay any dividends or patronage refunds, among other certain restrictions, until interest payments are resumed and all deferred interest has been paid. The note(s) may be redeemed, at the issuing association's(s') option, on October 15, 2013, or upon the occurrence of certain defined regulatory events, at a redemption price of 100 percent of the principal amount, plus any accrued but unpaid interest to the date of redemption, provided the issuing association(s) have made payment in full of all amounts then due in respect of their senior indebtedness.

NOTE 6 — NOTES PAYABLE TO AGFIRST FARM CREDIT BANK

The Association's indebtedness to the Bank represents borrowings by the Association primarily to fund its loan portfolio. This indebtedness is collateralized by a pledge of substantially all of the Association's assets and the terms of the revolving line of credit are governed by the General Financing Agreement (GFA). The GFA defines Association performance criteria for borrowing from the Bank, which for 2009 included borrowing base margins, earnings and capital covenants. The Association failed to meet its earning covenant at December 31, 2009. The default allows the Bank, in conjunction with the FCA, to accelerate repayment of all indebtedness. The Bank approved a temporary waiver of the default at December 31, 2009. During the first quarter of 2010, following review of a plan submitted by the Association to achieve compliance with the covenant, the Bank approved an extension of the temporary waiver of the default and allowed the Association to operate under a special credit arrangement pursuant to its GFA through June 30, 2010. The Association has continued to perform its obligations under the special credit arrangement.

NOTE 7 — FAIR VALUE MEASUREMENT

Effective January 1, 2008, the Association adopted FASB guidance on fair value measurements. This guidance defines fair value, establishes a framework for measuring fair value and expands the Association's fair value disclosures for certain assets and liabilities measured at fair value on a recurring and non-recurring basis. These assets and liabilities consist primarily of standby letters of credit, impaired loans and other property owned.

This guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

This guidance establishes a fair value hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The three levels of inputs and the classification of the Association's financial instruments within the fair value hierarchy are as follows:

Level 1

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets. The Association had no Level 1 assets or liabilities at March 31, 2010.

Level 2

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability. The Association had no Level 2 assets and liabilities measured at fair value on a recurring basis at March 31, 2010.

Level 3

Level 3 inputs to the valuation methodology are unobservable and supported by little or no market activity. Valuation is determined using pricing models, discounted cash flow methodologies, or similar techniques, and could include significant management judgment or estimation. Level 3 assets and liabilities also could be instruments whose price has been adjusted based on dealer quoted pricing that is different than the third-party valuation or internal model pricing.

Level 3 assets at March 31, 2010 included impaired loans which represent the fair value of certain loans that were evaluated for impairment under FASB guidance. The fair value considered the underlying collateral since these were collateral-dependent loans. The fair value measurement process uses independent appraisals and other market-based information, but in many cases it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters. As a result, these fair value measurements fall within Level 3 of the hierarchy. When the value of the collateral, less estimated costs to sell, is less than the principal balance of the loan, a specific reserve is established.

Other property owned was classified as a Level 3 asset at March 31, 2010. The fair value for other property owned is based upon the collateral value. Costs to sell represent transaction costs and are not included as a component of the fair value of other property owned. Level 3 liabilities at March 31, 2010 included standby letters of credit whose market value is internally calculated based on information that is not observable either directly or indirectly in the marketplace.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following tables present the assets and liabilities that are measured at fair value on a recurring basis at March 31, 2010 and December 31, 2009 for each of the fair value hierarchy levels:

	March 31, 2010			
	Level 1	Level 2	Level 3	Total Fair Value
Liabilities:				
Standby letters of credit	$ –	$ –	$ 35	$ 35
Total Liabilities	$ –	$ –	$ 35	$ 35

	December 31, 2009			
	Level 1	Level 2	Level 3	Total Fair Value
Liabilities:				
Standby letters of credit	$ –	$ –	$ 40	$ 40
Total Liabilities	$ –	$ –	$ 40	$ 40

The following tables present the changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the three months ended March 31, 2010 and 2009. The Association had no transfers of assets or liabilities into or out of Level 1 or Level 2 during the first three months of 2010 and 2009.

	Standby Letters Of Credit
Balance at January 1, 2010	$ 40
Total gains or (losses) realized/unrealized:	
Included in earnings	–
Included in other comprehensive loss	–
Purchases, sales, issuances and settlements, net	(5)
Transfers in and/or out of level 3	–
Balance at March 31, 2010	$ 35

	Standby Letters Of Credit
Balance at January 1, 2009	$ 45
Total gains or (losses) realized/unrealized:	
Included in earnings	–
Included in other comprehensive loss	–
Purchases, sales, issuances and settlements, net	(5)
Transfers in and/or out of level 3	–
Balance at March 31, 2009	$ 40

Assets and Liabilities Measured at Fair Value on a Non-recurring Basis

Assets and liabilities measured at fair value on a non-recurring basis at March 31, 2010 and December 31, 2009 for each of the fair value hierarchy values are summarized below:

	March 31, 2010				
	Level 1	Level 2	Level 3	Total Fair Value	YTD Total Gains (Losses)
Assets:					
Impaired loans	$ –	$ –	$ 1,310	$ 1,310	$ 767
Other property owned	$ –	$ –	$ –	$ –	$ –

	December 31, 2009				
	Level 1	Level 2	Level 3	Total Fair Value	YTD Total Gains (Losses)
Assets:					
Impaired loans	$ –	$ –	$ 2,614	$ 2,614	$ (2,319)
Other property owned	$ –	$ –	$ 600	$ 600	$ 89

NOTE 8 — DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

The following table presents the carrying amounts and fair values of the Association's financial instruments at March 31, 2010 and December 31, 2009.

Quoted market prices are generally not available for certain System financial instruments, as described below. Accordingly fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The estimated fair values of the Association's financial instruments are as follows:

	March 31, 2010		December 31, 2009	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets:				
Cash	$ 284	$ 284	$ 162	$ 162
Loans, net of allowance	$ 215,131	$ 215,445	$ 224,506	$ 224,989
Notes receivable from other Farm Credit Institutions	$ 10,000	$ 10,860	$ 10,000	$ 10,617
Financial liabilities:				
Notes payable to AgFirst Farm Credit Bank	$ 175,965	$ 176,611	$ 187,237	$ 187,910

A description of the methods and assumptions used to estimate the fair value of each class of the Association's financial instruments for which it is practicable to estimate that value follows:

A. **Cash:** The carrying value is primarily a reasonable estimate of fair value.

B. **Loans:** Because no active market exists for the Association's loans, fair value is estimated by discounting the expected future cash flows using the Association's current interest rates at which similar loans would be made to borrowers with similar credit risk. Discount rates are based on the Bank's loan rates as well as management estimates.

   For purposes of determining fair value of accruing loans, the loan portfolio is segregated into pools of loans with homogeneous characteristics based upon repricing and credit risk. Expected future cash flows and interest rates reflecting appropriate credit risk are separately determined for each individual pool.

   Fair value of loans in a nonaccrual status is estimated to be the carrying amount of the loan less specific reserves.

   The carrying value of accrued interest approximates its fair value.

C. **Investment in AgFirst Farm Credit Bank:** Estimating the fair value of the Association's investment in the Bank is not practicable because the stock is not traded. The net investment is a requirement of borrowing from the Bank and is carried at cost plus allocated equities in the accompanying balance sheet. The Association owns 0.97 percent of the issued stock of the Bank as of March 31, 2010 net of any reciprocal investment. As of that date, the Bank's assets totaled $30.1 billion and shareholders' equity totaled $1.7 billion. The Bank's earnings were $117 million during the first three months of 2010.

D. **Notes Payable to AgFirst Farm Credit Bank:** The notes payable are segregated into pricing pools according to the types and terms of the loans (or other assets) which they fund. Fair value of the notes payable is estimated by discounting the anticipated cash flows of each pricing pool using the current rate that would be charged for additional borrowings. For purposes of this estimate it is assumed the cash flow on the notes is equal to the principal payments on the Association's loan receivables plus accrued interest on the notes payable. This assumption implies that earnings on the Association's interest margin are used to fund operating expenses and capital expenditures.

E. **Commitments to Extend Credit:** The estimated market value of off-balance-sheet commitments is minimal since the committed rate approximates current rates offered for commitments with similar rate and maturity characteristics and since the related credit risk is not significant.

F. **Notes Receivable from Other Farm Credit Institutions:** Fair value is determined by discounting the expected future cash flows using appropriate interest rates for similar assets.

NOTE 9 – SUBSEQUENT EVENTS

The Association has evaluated subsequent events and has determined there are none requiring disclosure through May 7, 2010, which is the date the financial statements were issued.
